

Carbon Reduction Plan

Supplier name: Medicareplus International Ltd

Publication date: 10/10/2024

Commitment to achieving Net Zero

Medicareplus International Ltd is committed to achieving Net Zero emissions by 2050

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2023	
Additional Details relating to the Baseline Emissions calculations.	
<p>This is the first time we have reported our carbon footprint so this calculation establishes our baseline. It is based on our financial accounting year of April-March.</p> <p>Our Baseline calculation includes:</p> <ul style="list-style-type: none"> • Scope 1: Direct Emissions • Scope 2: Indirect Emissions • Scope 3 Categories: 3: Fuel and energy related activities: 4: Upstream transportation & distribution: 5: Waste generated in operations: 6: Business travel/Hotel stays: 7: Employee commuting/Teleworking: 9: Downstream transportation & distribution: <p>Our Baseline deviates from the requirements under PPN 06/21 as follows:</p> <ul style="list-style-type: none"> • Scope 3: Category 3: Fuel and energy related activities: is included as automatically calculated, well to tank emissions. 	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	61.8 tCO ₂ e
Scope 2	4.5 tCO ₂ e
Scope 3 <small>(Included sources as detailed above)</small>	620.8 tCO ₂ e
Total Emissions	687.1 tCO₂e

Carbon Reduction Plan

Current Emissions Reporting

Reporting Year: Apr 2023 to Mar 2024	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	40.5 tCO ₂ e
Scope 2	4.9 tCO ₂ e
Scope 3 <small>(included sources as detailed above)</small>	541.7 tCO ₂ e
Total Emissions	587.1 tCO₂e

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 559.9 tCO₂e by 2028. This is a reduction of 18.5 %

Progress against these targets can be seen in the chart below:

Carbon Reduction Plan

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2023 baseline and the measures will be in effect when performing the contract. The carbon emission reduction achieved by these schemes equate to 100 tCO₂e, a 14.6% reduction against the 2023 baseline.

- Reduced the number of company cars
- Switched to public transport for business travel where possible

Future Carbon Reduction Initiatives

In the future we hope to implement further measures such as:

- Remove remaining 2 company cars
- Switch to more sustainable packaging
- Move to a more energy efficient office

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans. Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
