MEDICAL ADHESIVE-RELATED SKIN INJURIES (MARSI)

Medical adhesive-related skin injuries (MARSIs) occur when medical adhesives remove superficial layers of skin, resulting in variable levels of skin damage, such as skin stripping, tension blisters, skin tears, contact dermatitis, maceration and folliculitis.¹

Who is at Risk from MARSIs?²,³,⁴,⁵

**Age-Related Risk**
- Elderly patients with age-related dermal fragility
- Infants in the Neonatal Intensive Care Unit (NICU)

**Treatment-Related Risk**
- Patients receiving:
  - Medications such as corticosteroids
  - Treatments compromising skin integrity, e.g. radiation therapy or chemotherapy

**Clinical Condition-Related Risk**
- Patients suffering from:
  - Incontinence or at risk of other moisture-associated skin damage
  - Malnutrition and dehydration
  - Dermatological conditions (eczema, dermatitis, chronic ulcer, epidermolysis bullosa)
  - Underlying medical conditions (diabetes, immunosuppression, venous insufficiency)
- Patients living with a stoma appliance

NON-STING

MARSI can be prevented by educating patients and carers on the correct application and removal of adhesive dressings or devices and by using a medical adhesive remover.

Competitively Priced Adhesive Remover for a Safe and Pain-Free Dressing Change

LIFTEEZ Adhesive Remover can be used to help prevent MARSI by dissolving the adhesives used on dressings, surgical tapes, stoma or ostomy pouches and tube securement devices.

Indications:
- Fast and painless removal of adhesive tapes, dressings and devices
- Removal of adhesive residue from the skin
- Prevention of Medical Adhesive Related Skin Injury (MARSI) such as skin stripping & skin tears
- Provides a positive dressing change experience
  - Improves patients’ compliance, comfort and confidence
  - Reduces the need for analgesia

Adhesive appliances on which Lifteez can be used:
- Adhesive dressings & padding
- Surgical tapes
- Adhesive securing devices such as:
  - Central lines,
  - Nasogastric (NG) tubes,
  - Intravenous (IV) cannulae,
  - Subcutaneous (SC) cannulae
- Stoma appliances
- Urinary sheaths
- ECG electrodes

Skin Friendly Formula
- Non-Sting formulation, pain-free application
- Healthcare grade silicone
- Alcohol, fragrance, latex, parabens and phthalates free
- Dries quickly and does not leave an oily residue on the skin

Clinically proven to protect your patients’ skin

Clinicians’ and Patients’ Feedback

“Much better dressing change, less painful” ¹

“More comfortable and less traumatic dressing change” ¹

“Dressing removal was amazing” ²

“Didn’t feel a thing” ²

Clinician Benefits of using LIFTEEZ:

• Reduction of time required for dressing change
• Increase of patient engagement in their own care
• Reduction of analgesia requirements
• LIFTEEZ allows the use of stronger adhesives
• No effect on adhesion of replacement wound dressing or stoma pouch

Patient Benefits of using LIFTEEZ:

• Reduction of skin trauma (skin stripping and redness)
• Reduction of pain at dressing change
• Reduction of patient’s anxiety at dressing removal
• No stinging on application

How to use LIFTEEZ

- Before each dressing or device removal:
  - Especially on very fragile skin
  - Where pain is being experienced at dressing or device change

- LIFTEEZ can be used on:
  - Intact or damaged skin
  - Adults, the elderly, children and infants

For Porous Material

- Spray or wipe over a porous dressing or device for instant removal
- Gently start to remove the dressing or device, pulling it parallel to the skin

For Non-Porous Material (Waterproof dressing or stoma appliance)

- Gently lift the edge of the dressing, pouch or adhesive device
- Gradually spray or wipe underneath the edge whilst removing the dressing, pouch or adhesive device

Removal of Adhesive Residue

- It is important to remove all the adhesive residue from the skin
- Use LIFTEEZ wipe or spray LIFTEEZ aerosol on a gauze swab and gently wipe the residue off the skin

- LIFTEEZ does not require rinsing after application
- LIFTEEZ does not compromise the adhesion of the next dressing or device
